

Assignment 5: EIP Research Task

Enterprise Integration Patterns for Messaging Solutions

Message-oriented middleware (MOM) is among the most popular infrastructures used for connecting distributed software systems. The best practices in implementing messaging in enterprise application integration refer to applying *enterprise integration patterns* (EIP).

One of the signature readings in this area is [the book](#) of Gregor Hohpe and Bobby Woolf "*Enterprise Integration Patterns Designing, Building, and Deploying Messaging Solutions*".

Your tasks are:

- to read the [Chapter 3: Messaging Systems](#), linked here
- to extract **minimum 12 terms**, related to messaging and integration, which you find essential for understanding the concept
- to create a [glossary](#) of those terms

Submit your list in Peergrade and add ten study points to your collection.

The task is individual.
